NUMBER 7.

## DR. SCOTT DEAD.

President Harrison's Father-in-Law Passes Away.

## DEATH IN THE WHITE HOUSE.

His Illness of Short Duration, Having Only Been Confined to His Bed Since November 13—The Burial Will Take Place at Washington, Pennsylvania.

WASHINGTON, Nov. 30.—Rev. John Witherspoon Scott, the father-in-law of President Harrison, died yesterday afternoon at ten minutes after 4 o'clock at the age of ninety-three years. He died in the executive mansion, where he went with his daughter and son-in-law when they made it their home. Dr. Scott's illness was of short duration. He went to Indianapolis with the party that accompanied Mrs. Harrison's remains. He bore the fatigues of the trip very well and returned to Washington in his usual health.

On Saturday, Nov. 12, he caught cold and was compelled to go to bed and place himself under the doctor's care. At 6 o'clock yesterday morning he was perfectly rational and held a short conversation with Lieutenant Parker, who had been sitting up with him.

Throughout the day, until 3 o'clock, the family thought there was a chance for his recovery, based upon the great vitality shown by him. At 2 o'clock Dr. Scott again began to decline and died at ten minutes past 4 o'clock. There were present at the bedside the president, Mrs. McKee, Mr. and Mrs. Russell Harrison, Lieutenant Parker and wife, Russell Scott, his grandson, and Dr. Hamlin, pastor of the Church of the Covenant, of which Dr. Scott was a member.

John W. Scott, the only surviving son, and Mr. McKee were the only members of the family absent. Before leaving the house Dr. Hamlin offered prayer in the library with the family.

Funeral services will be held in the east room of the White House Thursday afternoon at 10 o'clock. Dr. Hamlin will officiate.

The funeral party will leave this city Thursday evening for Washington, Pa., where the body will be interred Friday morning as requested by Dr. Scott, beside his wife, who was buried there in 1876, and his son Captain Horace Scott, who died of consumption. Captain Scott served under General Harrison during the war. The funeral party will start at once to Washington.

Judge Scott will not be able to attend the funeral, as he has just reached his home, Seattle, Wash., after having attended the funeral of Mrs. Harrison. The death of Dr. Scott makes the ninth that has occurred within the families and the attendants of the executive mansion since the commencement of President Harrison's administration. There were those of Mrs. Pruden, wife of the executive clerk, Major Pruden; Mrs. Scott Lord, sister of Mrs. Harrison; Mrs. Halford, wife of Private Secretary Halford; the coachman, the lamplighter who had been employed in the White House for a quarter of a century; Frank A. Cox, the telegrapher; Mrs. Harrison; Captain Dinsmore, chief usher, and Dr. Scott.

Dr. Gardner, the attending physician, says the immediate cause of death was exhaustion, due to old age. He retired a week ago last night with a cold, and on Tuesday was unable to get up. The cold was followed by a low fever which greatly prostrated him. When this had run its course a slight reaction and rally ensued on Thursday, lasting forty-eight hours. Saturday night there was a turn for the worse and he rapidly sank into a lethargic state, with fitful periods of consciousness. Notwithstanding his advanced age Dr. Scott had never been the victim of any organic disease, and seldom required the services of a physician, and then only for a passing ailment. He died because the machinery of his body was worn out.

Rev. John W. Scott, the father-in-law of President Harrison, was born with the century, the date of his birth being Jan. 22, 1800, little more than a month after the death of George Washington. His boyhood was spent in the vicinity of Hookstown, Beaver county, Pa., where he was born. His father was a well-to-do resident of that place and gave to his son a good education which he turned to advantage in his future life. He became a minister of the Presbyterian church and filled several pulpits acceptably, but in a few years his voice failed and he was forced to give up his vocation.

After teaching in several schools, among them the Hanover university, in Hanover county, Ind., he established the Western Female seminary at Oxford, O. Here was situated Miami university where Benjamin Harrison received the finishing touches to his education. Mr. Scott had five children, three daughters, Mary, who died young; Elizabeth, who married Russell Lord; Caroline, who married Benjamin Harrison, and two sons, Henry M. and John N. Mr. Lord died in Washington two years ago; the son Henry, is also dead, leaving John N. Scott as the sole survivor of Dr. Scott's children.

During the time when Mr. Harrison was a United States senator, Dr. Scott was appointed to a clerkship in the pension office, and he held this position until his son-in-law became president. He resigned then and moved to the White House, where he has since resided. About a year ago he paid a visit of several months to his son, John N. Scott, at Port Townsend, and stood the fatiguing journey across the continent without ill effect. Dr. Scott was a man of wonderful physical vigor, tall, broad chested and well preserved mentally. He used to say that he believed he was in his prime at sixty. He was seldom ill, but had no regular rule of diet or exercise to keep him in good physical condition.

## ROBBERS RUN IN Two Men Arrested Give Their Pals Away.

NASHVILLE, Nov. 30.—One of the boldest and most troublesome gang of robbers known in the south has been run to the earth in Nashville. Last week P. E. Raymond and Frank Connell were arrested here as pickpockets. They told on their pals and now J. H. Courtney, E. Gibson, J. W. Wallace, H. Smith and Mike Connovan are in jail here.

The gang have worked Birmingham, Augusta, Memphis, Atlanta, New Orleans, Louisville and other cities to the amount of about \$10,000 each. They robbed a jewelry store in this city several days ago of \$2,000 worth of diamonds. The gang is known everywhere, especially in Chattanooga, which city suffered intensely. It is said that they are the parties who held up several trains in northern Georgia recently.

## FLYER AND FREIGHT.

### Two Trains Run Together Near New London, Connecticut.

NEW LONDON, Nov. 30.—The short line "flyer," which left here for Boston, at 5:05 p.m., was run into just west of the Noank station, four miles from here, by a freight train that left here at 4:35. The freight was sidetracked at Poquonock to let the "flyer" pass and then followed.

The "flyer" was at a standstill when it struck. The freight locomotive dashed into the dining room car and it was burned up. Three of the parlor cars were thrown from the track and trains will be delayed for an hour or two. No one was killed and none are reported injured. The cause of the accident is not quite clear at present.

## Freight Office Burglarized.

WABASH, Ind., Nov. 30.—Shortly before 2 o'clock yesterday morning a terrible explosion aroused the inhabitants of the eastern part of the city. Investigation showed that the freight office of the Wabash railroad had been entered through a window, a hole drilled in the safe, and a big charge of powder discharged. The safe door was blown clear through the west wall of the building, and landed twenty feet away on the platform. The furniture and everything in the room was piled up in confusion, and gaping holes in the walls are visible on all sides. Not a penny was obtained by the cracksmen who, a half hour later, tried to blow the safe in Simon Cook's junk establishment, but abandoned the attempt, leaving a broken drill.

## Attempted Assassination.

JEFFERSONVILLE, Ind., Nov. 30.—A cowardly attempt was made Monday night at 12 o'clock to assassinate John Shibley, a young man, twenty years old. While on his way home from the city to Howard Park, a man stepped out in front of him from behind a tree, and, without the slightest warning, shot Shibley in the right side, on the ribs, and fell unconscious, but revived and reached home a half hour later. He is now in a dangerous condition. Shibley is positively unable to give any clew as to his assailant, but the people blame the numerous tramps and propose to run them out at all hazard.

## Two Men Fatally Injured.

BRAZIL, Ind., Nov. 30.—John Slaughter, twenty-one years old, and George Brown, twenty, living near the No. 5 school house, both the only sons of widows, were fatally injured Monday at Winn's crossing, five miles north of here. They had been to this city and were on their way home on the Chicago and Indiana Coal railroad. The train did not stop at Winn's crossing, and both men attempted to get off. They jumped, and were thrown forcibly upon a pile of rocks. Slaughter's skull was crushed in and the left eye torn out. He is dying. Brown's skull was fractured. His injuries are believed to be fatal.

## Only Lasted Two Rounds.

SAN FRANCISCO, Nov. 30.—The fight between Jim Barren, of Australia, and Robert Dobbs, of Omaha, lightweights, took place before the Palo Alto Athletic club last night. Barren won in the second round, scoring a clean knockout. The first round was all in Dobbs' favor, Dobbs landing repeatedly on Barren's face and head. In the second round Barren took the lead and, after a hurricane rally, put Dobbs to sleep before the round was half over.

## Enforcing a Liquor Law.

CRAWFORDSVILLE, Ind., Nov. 30.—Monday night the Crawfordsville council decided to take a determined stand against the violations of the liquor law. The matter of passing a screen ordinance was canvassed, and every councilman, with one exception, declared in favor of it. The ordinance will be passed at its next meeting.

## Assisted in the Fight.

INDEPENDENCE, Mo., Nov. 30.—Professor T. A. Volrath, a musician, was yesterday publicly horsewhipped on the main street by Mrs. Mary Wason, a respectable woman he had slandered. Volrath's wife assisted in the horsewhipping, holding her husband on the ground while Mrs. Wason plied the rawhide until she became exhausted.

## Bank Falls.

DETROIT, Nov. 30.—A special to The News from Ithaca, Mich., says: Church, Bills & Company's bank failed to open its doors here this morning. The cashier, W. B. Scattergood, says that he can give no statement at present, only that the failure of G. P. Bills & Company, of Tecumseh, has embarrassed this branch.

## Mexican Cabinet Resigns.

CITY OF MEXICO, Nov. 30.—Sub-Secretary of Foreign Affairs Aspiroz Monday delivered to President Diaz the collective resignation of the entire cabinet, leaving him at liberty to appoint a new cabinet after his inauguration for his next term, which begins Dec. 1.

## STRIKERS IN WANT.

### Homestead Men in Destitute Circumstances.

## PITIABLE IN THE EXTREME.

Aid Must Be Forthcoming Immediately, as the Distressed Condition is Rapidly Becoming More Prevalent—A Committee Appointed to Solicit Aid for the Sufferers.

PITTSBURG, Nov. 30.—Reports from Homestead are that a majority of the families of the defeated strikers are suffering seriously for want of the bare necessities of life. Aid must be forthcoming immediately, as the distressed condition is rapidly becoming more prevalent. Homestead citizens are rendering every possible assistance, but are entirely unable to meet the fast increasing demands.

Last night a citizens' meeting was held in the McKeesport opera house and a relief organization effected. James Powers, of Chicago, one of a committee sent by Chicago labor organizations to investigate the condition of the Homestead strikers, addressed the meeting. He has conducted a house to house canvass of Homestead and reports the condition of many of the once prosperous families, as pitiable in the extreme. He says that not over 5 per cent of the total number of strikers have secured work and that there is much distress. A committee to solicit aid for the needy Homesteaders was organized in this city yesterday.

## BUCKEYE AGRICULTURE.

### Its Showing at the World's Fair Will Be an Eye-Opener.

COLUMBUS, O., Nov. 30.—The world's fair commissioner, Hon. Daniel J. Ryan, is having prepared for shipment the agricultural exhibit of Ohio. The varieties in store are so numerous as to cause surprise that Ohio's soil is capable of producing such a diversity. For instance, there are on hand already 436 varieties of wheat in the straw, all grown in this state, and the chances are that others will yet be received. Of oats there are 137, grasses 350, corn in stalk 300.

There are to be seen in glass jars 130 varieties of threshed out wheat, oats 40, barley 6, rye 3, corn 87. There are twenty-five varieties of corn in the ear averaging thirteen inches to the ear. Of other seeds of all kinds there are fifty-six varieties.

It is rumored that the commissioners of Indiana and California have been obtaining Ohio agricultural products to use in their own exhibits, but the rumor is open to suspicion.

## CENSUS BUREAU.

### Recommendations Made by Superintendent Porter.

WASHINGTON, Nov. 30.—Superintendent Porter in his annual report to the secretary of the interior again recommends that the census office be made a permanent bureau of the government. From the beginning of the eleventh census up to the fiscal year June 30, 1892 the total disbursements for the service amounted to \$8,203,693, a portion of which was for pay of enumerators, \$2,485,458; farms, homes and mortgages, \$1,005,771; census proper, \$663,562; manufactures, \$648,379; printing and stationery, \$631,086.

Since July, 1891, the number of clerks on the roll of the office has been reduced from 2,330 to 1,214, and by the beginning of the new year the employees will not exceed 1,000. It is estimated that \$240,000 will be required to run the office from March to June 30, 1893.

## At the Mercy of Toughs.

CANTON, O., Nov. 30.—A gang of drunken toughs from Canton took possession of the town of Waco, near here, terrorizing citizens and assaulting C. G. Hutt, school teacher, and a number of other people. The town is without police protection and at the mercy of toughs. A couple of girls were roughly handled, and interference met with a volley of stones, clubs and like weapons. Many were injured. Police aid from Canton was summoned, but before they could get to Waco the men fled. Hutt and the other injured residents came to town and swore out warrants.

## Bound Over to Court.

RAVENNA, O., Nov. 30.—Major L. H. Bean, who threatened to shoot Robert Beatty at Ravenna for inducing the former's niece to have her photograph taken in tights, after being placed under bonds to keep the peace was again arrested for drawing a revolver on Beatty. Bean waived examination and was bound over to court under bonds.

## A Foul Crime Suspected.

MILAN, Tenn., Nov. 30.—Samuel Yates, a miser reputed to have a vast hoard of money secreted in his residence near this city, was burned in a fire which destroyed his house. The police suspect that he was murdered and robbed and the house set on fire to conceal the crime.

## Doubtless Exaggerated.

LONDON, Nov. 30.—The large business done in Great Britain in American canned goods, which have been rapidly growing in the last four years, is likely to be seriously checked by the alarming number of deaths from poisoning alleged to have resulted from eating canned goods.

## The Canadian Pacific Will Get It.

MONTRÉAL, Nov. 30.—It is considered settled in well informed circles that the Canadian Pacific Railway company will get the government contract for the fast Atlantic mail service and that the line will probably be established next summer.

## HOLMES' COMET.

The Celestial Stranger Can Never Collide with the Earth.

LICK OBSERVATORY, Cal., Nov. 30.—The Holmes comet has been observed here since Nov. 8 but the stormy weather has prevented observations every night of the past week, except one. Its position in the sky has been accurately measured by Professor Schaeberle with a meridian circle and by Professor Barnard with a twelve-inch telescope. The latter has also secured a good photograph of the comet. Mr. Campbell has observed its spectrum visually and photographically with the great equatorial.

The observations show that in many respects it is the most remarkable comet of recent years.

On Nov. 8 its diameter was one-sixth of the moon's diameter. It was so sharply defined, rounded and dense that it resembled a planetary nebula. Near the center of the ball, called the coma, was the unusual nucleus slightly elongated. Diverging from the nucleus in the direction opposite the sun, was a dense tank-like structure which could be traced up to the edge of the coma, and it was visible even beyond the edge when the bright coma was just outside the telescope. This structure was the tail of the comet in embryo, which has since increased considerably in length. The spectrum of the comet is unique. All parts of it give a continuous spectrum, but underlying there is certainly a trace of the green band, in which respect observations here differ from those reported from other observatories.

The apparent size of the comet has continually increased until now it is about two-thirds the diameter of the moon. It is quite diffused and elongated and has the appearance of an ordinary comet. Though it has grown larger it has also grown fainter and is barely visible to the unassisted eye. Computers agree that it is not Biela's comet and that it is not close to nor approaching the earth. In fact, it is moving in an eclipse around the sun. Its orbit seems to lie entirely outside the orbit of Mars and it can therefore never approach us even as closely as Mars does.

The meteoric shower of Nov. 23 could not be seen here on account of clouds.

## BIG BAIL.

The Cases of Hugh Ross and John McLuckie Called in Court.

PITTSBURG, Nov. 30.—The application of Hugh Ross and John McLuckie for their release on bail was heard before Judges Kennedy and McClung yesterday afternoon. Neither of the prisoners were in court. They were each bailed in the sum of \$10,000 on the charge of treason, no objection being made to this. The application for release on bail in the murder case of Hugh Ross was postponed till Thursday as the commonwealth was not ready to argue the matter.

The bail in the murder case of McLuckie was fixed by Judge Magee some time ago at \$10,000. This, with the bail for treason and riot, will make \$22,000 bail. Oliver Murphy and Oliver C. Coon went his bail and he was released.

## THE PRESIDENT'S MESSAGE.

It May Not Be Sent to Congress Monday on Account of Dr. Scott's Death.

WASHINGTON, Nov. 30.—There is a possibility that on account of the death of Dr. Scott, the annual message of the president to congress may be delayed in its presentation to congress, but the delay will not be for more than a few days.

The president is a hard worker and he has already completed most of his task. To finish the message will not require a great deal of time, and after the funeral of Dr. Scott he will be able to devote the following days exclusively to its preparation. In the event that the message is not sent to congress Monday the president will transmit a brief statement promising "a message in writing" at an early day.

## Woman Sent Up.

COLUMBUS, O., Nov. 30.—Mrs. Sarah Boone, convicted of manslaughter for complicity in the killing of Nettie Mayo's babe, will go to the penitentiary for five years. Judge Evans overruled the motion for a new trial, and pronounced sentence. As to the testimony of Nettie Mayo, the mother of the child, Judge Evans said it was entitled to no credit, except as corroborated by other evidence, and announced that she was guilty as either.

## The Cow Killer's Work.

COLUMBUS, O., Nov. 30.—Jack the Cow Killer, has been at work again. This time he selected one of the most conspicuous and fashionable parts of Columbus. He horribly mutilated a cow belonging to David Greene, on East Broad street, opposite his house, and tried to kill another cow belonging to A. C. Rogers, Monday night. On the following night he butchered a cow in another part of the city. Police have no clew.

## Well Known Citizen Dead.

NASHVILLE, Nov. 30.—Berrien Blaske, assistant civil engineer of the Nashville, Chattanooga and St. Louis railway, who was burned here last Wednesday night by the premature explosion of fireworks during the Cleveland celebration died at 5 o'clock yesterday morning. Mr. Blaske was one of Nashville's most prominent and popular society men and his tragic death will be deeply mourned.

## Italy's Financial Condition.

ROME, Nov. 30.—The minister of finance Monday made a statement to the chamber of deputies regarding the financial condition of the country. He declared that whereas the budget for 1891-2 showed a deficit of 1,84

### WEATHER INDICATIONS.

For Kentucky, fair, warmer; winds becoming southerly.

A SURVEY is being made for an electric railway between Cincinnati and Springfield, O. What has become of that Mayville and Cincinnati scheme?

THE Danville Advocate will soon be issued as a tri-weekly. You can't get too much of a good thing. Here's success to the Advocate in its new venture.

THE Republicans are probably not much scared with any story about the comet striking our planet since their experience with the cyclone of November 8th.

It pays to advertise. D. H. Houser, a prominent citizen of Forsyth, Ga., inserted a notice in the Atlanta Constitution that he wanted a wife, and as a result he this week married one of Atlanta's charming and popular young women.

### Legislative News.

Three bills were introduced in the House yesterday, none of them of general importance.

The bill creating the office of associate mine inspectors was passed. It provides for a salary of \$1,200 per annum to the Assistant Inspector, whose duty it shall be to watch after the interests of miners and see that they are given such ventilation as is necessary to their health.

The House spent the remainder of the day on the Revisory Commission and Fence bills.

The Senate had up the question of salaries to the Senate and House employees. The bill had once passed in the Senate and was defeated in the House, and another effort was begun to get it through, which was finally done by a vote of 21 to 10.

The bill fixes the pay of chief and assistant clerks and enrolling clerks at \$10 per day; janitors, \$5 per day; pages, \$3 per day.

### VOX POPULI.

"A Democrat Who Will be no Applicant For Office" Dilates on "Favoritism" and "Bossism."

[Published by Request.]

Democrats, look to the interests of your party, by downing bossism in your party, and by so doing, you create harmony and good feeling all along the line, from the Commander-in-Chief to the humblest private in the ranks.

As our Government (Republican in form and fact) is known to be of the people, and all the power of same comes from the people, which the recent election of the Hon. Grover Cleveland to the office of President of the United States for the next four years so clearly demonstrates, our Senators and Representatives in Congress, being the law-making power of the Government, elected by the people and of the people, furnishes still another example of the people's power. Then I would ask whence comes this assumption of power by which a U. S. Senator or Congressman when approached by the "private in the ranks," or one of the "boys in the trenches," asking at his hands an endorsement for this office or that, he should be told by the Hon. Senator or Congressman: "Oh, no, I can not endorse you, I am for Colonel Blank, or Mr. Blank, and you are not in it." Is not this a grand state of affairs in a people's country and Government for one of the rulers to learn from his Representative or servant that he is not only not in it, but very foolish to ask for an office?

The President, Mr. Harrison, has only learned in the last two weeks the power of the people, and their disposition and eagerness to use it when their wishes are ignored, and it is to be hoped that the President, as well as those more fortunate than himself, have learned a wise thought to him a sad lesson. Both Democrats and Republicans will agree that bossism entered largely into the causes of the recent overwhelming defeat and downfall of the Republican party. Democrats, forewarned is forearmed. It is a well known fact that during Mr. Cleveland's first term many persons were appointed to office by recommendation of Senators and Congressmen, whose claims consisted alone of either favoritism or kinship, neither of which should be considered or tolerated by the Democratic party, as the party has always opposed *nepotism*. The first thing that should be considered is the applicant's fitness for the office applied for, coupled with the wishes of the people whom he is to serve, and when the people have notified their Representative in Congress who they want to serve them in whatever office may be applied for, that you will *expect* and *insist* that your wishes be endorsed, or you as Democrats will take steps at once to find *some one* to elect who will respect the wishes of his constituents instead of playing the *boy* to the destruction of the party. And to this end, permit me to suggest to the "boys in the trenches," if you desire to be heard at Washington, organize at once by precincts, counties, districts and State, and insist that your Senators and Representatives in Congress must pay attention to the wishes of their rulers, the people, in their endorsement of any man. And when you organize pledge yourselves to defeat any representative who persists in ignoring your wishes, and not decide too quickly for their favorites, regardless of who their rulers, the people, may desire to serve them as Collectors, postmasters, &c. Let your motto be: "Long Live Democracy and Down With Bossism, the Foe to Party Prosperity."

H. C. CLAY.

TOBACCO in barns, ins. by D. M. Runyon.

### COUNTY CULLINGS.

Items Picked Up by the Bulletin's Correspondents in Mason and Elsewhere.

#### GERMANTOWN.

Mrs. P. B. Johnson and grandsons, of Covington, are visiting her son, W. C. Johnson.

Mrs. McElhanan, of Berlin, is visiting her father, Dr. Blackerby.

W. A. Pepper and wife spent Saturday and Sunday with the family of John R. Burgess, near Beasley.

W. R. Crihfield and Tommie Tyler went to Lexington last week to make sale of some valuable horses. One of Mr. Tyler's best horses died en route at Paris.

John Bell and family, of Flemingsburg, are visiting A. Williams and family.

Misses Emma Disher and Netta Hill, of Mt. Olivet, spent a couple of days visiting Miss Laura Browning.

Miss Hattie Erion spent Thanksgiving with her sister, Ida, attending school at Ashland.

The shooting stars failed to realize Sunday night. We presume one of our citizens was correct when he said "the rain put them out."

Prof. Curry has introduced a new study into his school—"practical photography."

The already numerous colony from our town in Maysville will receive a valuable addition in a few days in the person of George Bishop and wife. We regret very much to lose them.

#### SARDIS.

The Asbury-Frazee reception at "Mt. Airy," home of the grown, near Fern Leaf, November 23rd, was a grand affair. Covers were laid for seventy guests. The menu was choice and dainty. Mesdames Worthington, Byers and Boyd, and Misses Mary Asbury and Lulu Jones were the purveyors. Mr. and Mrs. Ben Wood represented Shannon. The BULLETIN'S Desha Valley reporter was remembered with a slice of the bride's cake, which being placed under his pillow made him dream of the happiest, sunniest hour of all the voyages—the opening of married life.

John Bell, one of the victims of the Greeley railway wreck on the Missouri Pacific, returned home a week ago, and while he is a sufferer from a broken arm he may be congratulated on having fallen into good hands. Dr. C. C. Owens is his surgeon; A. M. J. Cochran, of Maysville, is his attorney to settle with the railway authorities, and his good wife is his nurse, while his three children are a solace and comfort. The Kansas people with whom he was thrown was very kind and ministered to his every want. The verdict of the Coroner's inquest was that "Robert T. Tarlton came to his death through the negligence of the Pacific Railway Company."

#### SHANNON.

The Degman-Tinder series of revival meetings at Sardis commenced Monday night. In the language of Elder Tinder, "Come out and enjoy the meetings with us."

In the brief outline we gave of the funeral ceremonies held over the remains of Mrs. Amanda Watson, the opening and closing paragraphs got separated in the make-up of the paper. The observing reader knowing what had transpired at Shannon had no difficulty in connecting the paragraphs, while a stranger might have been some what puzzled. The little tribute was intended as a tiny flower (and she was so fond of flowers) upon the grave of her who had embarked upon a long voyage, over the shoreless sea, from which there is no returning.

#### County Court.

W. T. Cole was appointed administrator of Charlotte Wadsworth, and qualified with Allan D. Cole as surety.

Sheriff Alexander produced his quietus from the State Auditor for the revenue for year 1892, which was filed.

An inventory and appraisement of the personal estate of Mary Ann Russell was filed.

John Beckett, Thomas Glascock and John Powell were appointed appraisers of the personal estate of William Duvall, deceased.

One mile of the Big Pond turnpike was reported completed, and James Earsman and Frank Lunsford, Justices, and W. C. Pelham, surveyor, were appointed to examine and receive said mile.

James Robert Spurgeon qualified as a Notary Public, with Richard Burns as surety.

#### Business and Democracy.

"The election of Mr. Cleveland," said a well known traveling man from New York, "will have a salutary effect upon the whole country. I expect to double my customary sales during the coming year, and I have heard as many as a hundred different merchants in the South avow that if Mr. Cleveland was elected the house I represent would receive an order for as much again as they had been in the habit of purchasing. I believe that the next four years will evince the fact the Democratic party is essential to the growth and prosperity of the country."—Exchange.

#### The Fire Record.

The National Board of Fire Underwriters estimates the value of the property destroyed by fire in the United States in the year 1891, at \$143,000,000, and for the ten years ending December 31, 1891, at over \$1,100,000,000.

All this was absolute loss, so much value utterly destroyed. Insurance only distributes particular losses so that they do not fall so heavily upon individuals; it does not save any portion of this enormous value, which is completely gone. It is so much deducted from the national wealth; so much forever dissipated in smoke.

#### Notice to Tax-payers.

Thursday, December 1st, will be the last day for payment of city taxes.

R. A. COCHRAN, JR.,

Collector and Treasurer.

#### Policemen and Their Pistols.

Some of Cincinnati's policemen have been a little too free in the use of their guns of late, and Chief Deitsch has issued a general order in which he says: "If an officer, with or without a warrant, attempts to arrest a person charged with a misdemeanor, or the violation of a city ordinance, and the person fly from arrest, the officer has no right to shoot at the escaping person, though he can not otherwise be overtaken."

"If an officer, with or without a warrant, attempts to arrest a person charged with a felony, and the person fly from the arrest, the officer has a right to shoot at the escaping person if he can in no other way be taken, but great care must be exercised so that no innocent person is injured and no random shooting practiced calculated to injure any one."

"The reckless discharge of firearms in crowded streets or other places by officers of this department will, under no circumstances, be permitted."

#### Advertised Letters.

The following is a list of letters remaining in the postoffice at Maysville, Mason County, Ky., for the week ending Tuesday, November 30, 1892:

Bradford, Tilden (Humphrey, Wm. H. Carpenter, Mrs. Mary L. Kilkeary, N. Chambers, John Mayes, G. I. Ellis, Miss Ella F. Sears, Mrs. Amanda Fisher, F. D. Shryock, O. W. Gillen, James Thompson, Mrs. Lou Glenn, P. S. Yancey, Miss Martha Hopper, Miss Lettie York, Miss Belle.

Persons calling for any of the above will please say advertised. One cent due on each for advertising.

THOS. A. DAVIS, P. M.

#### The Ladies.

The pleasant effect and perfect safety with which ladies use themay California liquid laxative Syrup of Figs, under all conditions, make it their favorite remedy. To get the true and genuine article, look for the name of the California Fig Syrup Co., printed near the bottom of the package.

THE Lexington Press tells of an unusual and exciting episode at a fashionable wedding at Versailles. Thanksgiving evening L. B. Givens, a well-known Harrodsburg gentleman, and Miss Lillie Young of Versailles, were married. A young man by the name of Shouse, a nephew of Elder Shouse, who had been an ardent admirer of Miss Young, had boasted for several days that he intended to kiss the bride after the ceremony, and he did. Walking boldly up to the lady, without saying "if you please" to the groom, he threw his arms around her and planted a kiss upon her pretty mouth. Then there was trouble. The indignant groom let go his good right arm and laid out the presumptuous young fellow.

When Baby was sick, we gave her Castoria.

When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

## RUBBER GOODS IN MEN'S, WOMEN'S AND CHILDREN'S, IN COMPLETE LINES, AT BARKLEY'S.

### CINCINNATI'S NEW PAPER.

It Will Be Called the Tribune, Will Sell for Two Cents and Speak for Southern Interests.

Cincinnati's new morning paper is a certainty. One of the strongest companies ever organized in the Queen City for any purpose is back of it. The list of stockholders comprises nearly one hundred of the leading business men of that city. The capital stock is \$200,000. Its officers and directors are, Archer Brown, President; Stephen H. Wider, Treasurer; Albert Lawson, Secretary; James N. Gamble, Aaron A. Ferris, James J. Hooker, Alexander Offner, Albert Erkenbrecher.

The Tribune (which is the name of the new paper) will occupy one of the handsomest buildings in the city, on Main street, directly opposite the post-office. Hoe & Co. of New York, are working on the finest equipment for it ever ordered from Cincinnati. The Tribune will be entirely free from sensationalism of every kind, and it is the intention to make it the best and most popular paper in the Ohio valley. It will be independent Republican in politics, and will sell for two cents.

Albert Lawson, late with the St. Louis Republic, will be the Tribune's managing editor, and Charles H. Scott, late with the Chicago Herald, will be its business manager. The Tribune will make its appearance about the holidays. The owners' purpose giving special attention to the industrial and commercial interests of the South, in which the merchants of Cincinnati have a deep interest, notwithstanding the contrary tone of some Cincinnati journals.

The price of the Tribune by mail will be 50 cents per month or \$6.00 per year.

### PURELY PERSONAL.

Mrs. John H. Hall is visiting relatives at Winchester.

Rev. P. B. Hall, of Richmond, Ky., is the guest of Rev. C. S. Lucas.

Mr. James H. Hall left this morning on a business trip to New Orleans.

Mr. and Mrs. Henry Hampton have returned from a visit at Cincinnati.

Miss Mamie White is visiting the family of Mr. J. G. Kercheval, of Covington.

Miss Kate Bledsoe, of Minerva, is visiting Miss Lucy Durrett, near Washington.

Miss Retta Smoot, of Minerva, is spending the week with Misses Bessie and Lelah Martin, of Forest avenue.

Mr. and Mrs. John B. Fleming have returned home from an extended visit at Ashland, Ironton and Huntington.

Mr. Robert H. Wood, of Washington, has returned from a two-weeks' visit to his relatives, the LaRues, in Bourbon County. His aunt, Mrs. LaRue, is still very ill, with no sign of improvement.

Mr. Joseph F. Thompson, Sr., who spent the summer here with his son, Mr. Joseph Thompson, left this week for Washington City, where he will reside with his son-in-law, Captain John W. Peterson.

### RIVER NEWS.

Still falling here, but very slowly. The gauge showed a stage of 7 1-10 feet this morning.

The Telegraph down this morning had a big trip of freight. She left 250 barrels of salt here.

The St. Lawrence arrives from and returns to Cincinnati daily except Sunday. She leaves here every evening.

Due down: Keystone State this evening and Bonanza to-night. Due up: Stanley for Charleston and Telegraph for Pomeroy to-night.

The Vanceburg packet Silver Wave has been in and out on time for over two weeks, notwithstanding the statement in yesterday's Ledger that she had not yet resumed her trade.

Weather Observer Basler of Cincinnati failed to show up yesterday to examine and receive the river gauge. He had written that he would be here, but did not keep his appointment.

### New Departure.

After 6 o'clock p. m., for this week only, 5 per cent. for cash will be allowed on all holiday goods sold at J. T. Kackley & Co.'s. Special sale and display of books will be made at night. Everybody invited.

### New Estate Transfers.

Oscar Hanna and wife to Eleanor S. Mannen, a house and lot in Dover; consideration, \$1,000.

John Weir and wife and Elizabeth Weir to Nancy S. White, lot No. 33 in Clifton; consideration, \$120.

New buckwheat—Calhoun's.

### SCHOOL FOR STUDYING VICE.

Seminary Social Settlement for Theologues to Be Established in Chicago.

CHICAGO, Nov. 30.—A school in which men and women are to be the text books is about to be established in Chicago. The Chicago Theological seminary, of which it is to be an adjunct, will be the founder, and the department will be under the supervision of the eminent sociologist, Professor Graham Taylor. The announcement was made Monday evening that it had been decided to secure a building in some quarter of the city where the ignorant and vicious classes congregate, and found a "seminary social settlement." Here will be established a small community of students—prospective ministers of the gospel—who will study social problems at first hand.

"The settlement will not be a mission," Professor Taylor said. "The ordinary student, in preparing for the ministry, is educated away from the people. The idea of the actual seminary social settlement is to bring him in touch with the people. When the department has been fully organized students will be sent into the police courts to study life there, and the divorce courts will not be neglected."

### THE REPUBLIC'S ENEMIES.

Defeat of the French Government Makes Them Happy.

PARIS, Nov. 30.—President Carnot held a conference with M. Loubet Tuesday morning. He has summoned M. Floquet, president of the chamber of deputies, and Senator LeRoyer to consult with them on the situation.

It is reported that if M. Frisson declines to form a ministry, President Carnot will ask M. Tirard or M. Bourgeois, former ministers, to undertake the task. It is certain that M. De Freycinet, M. Bihot and some other members of the Loubet ministry will be in the new cabinet.

The Republique Francaise deplores the political confusion which, it says, was never before so complete. The crisis, it adds, will serve the interests of the enemies of the republic.

The conservative press is delighted at the upset of the ministry.

The Party National asserts that President Carnot will send a message to parliament in order to determine the situation.

### LOADS OF GOLD

In Mines Recently Discovered in Indian Territory.

ST. LOUIS, Nov. 30.—Bob Neff, a traveling salesman, returned Monday from the Comanche country, in the Indian Territory, and says there is much excitement over the discovery of gold in great quantities along Rainey creek, and in the Indian mines in the Arbuckle, Rainey and Wichita ranges by white prospectors. Neff says several companies have been formed, in which senators and congressmen are prominent, to get possession of the mines.

### Returning to Work.

NEW YORK, Nov. 30.—More than 200 members of the Electrical Wiremen's union were able to return to work yesterday by reason of the fact that the strike of the union, which has lasted two months, was settled last night. The agreement between the union and the bosses stipulates that wages and hours are to remain undisturbed until April, 1893. The bosses can engage men without inquiring whether or not they are union men.

### Claim They Saw the Comet.

NEW ORLEANS, Nov. 30.—The Picayune's Crockett (Tex.) special says: A number of citizens claim to have seen the comet Sunday evening. About 4 o'clock Monday morning seventy-three shooting stars were counted. One dashed from southeast to southwest, making a loud report, resembling thunder, and brilliantly illuminated the horizon for thirty seconds.

### Lynching Feared.

ROME, Ga., Nov. 30.—Sheriff H. N. McGinnis, who was shot last Friday night by train robbers at Plainview, died yesterday afternoon. It is feared that a mob of citizens will enter the jail at Calhoun when they learn of the sheriff's death and take out Chester Scott and Ben Morrow and hang them.

### Reducing Puddlers' Wages.

POTTSSTOW, Pa., Nov. 30.—A notice was posted yesterday at the Pottstown Iron company that from Dec. 12, the wages of puddlers would be reduced from \$3 to \$2.75 per ton. In 1886, \$6.50 per ton was paid at the works to puddlers for the same work that they are now to receive \$2.75 for.

### Collision of Freight Trains.

PETERSBURG, Va., Nov. 30.—A collision between two freight trains occurred yesterday on the Norfolk and Western railroad, a short distance from Blackstone. Both locomotives and forty-five freight cars were wrecked. William Lester, fireman, was painfully scalded.

### Gas for Urbana, O.

CELINE, O., Nov. 30.—D. C. Freeman, a gas well driller, has completed a gas well for the Urbana Natural Gas company, which is located on the south side of Lake Mercer, and is as good a well as has been drilled for three years. It is good for 3,000,000 feet a day. Freeman says the gas is not decreasing in volume, but the pressure has diminished a little; but not enough to make the situation alarming.

### Another Cheerful Pistol Idiot.

COLUMBUS, O., Nov. 30.—Lottie Smith, the wife of a tinner, while at the residence of Mrs. John Holly, a friend, last night, playfully pointed the handle of a revolver at Mrs. Holly, at the same time pulling the trigger. The muzzle being pointed toward Mrs. Smith, the ball entered her body above the heart, passing through one lung. Her injuries are considered fatal.

### Boddlers Fined.

TOLEDO, Nov. 30.—Judge Harmon yesterday afternoon sentenced the boddlers councilmen, six in all, to pay a fine of \$350 and costs each and to stand committed to the workhouse until the amount is paid.

### Safeguards Against Cholera.

The practical question which concerns us in this country is the danger to which we are exposed. This is not very great. In the first place the fact of the existence of the disease is known, and in such matters to be forewarned is emphatically to be forearmed. Second, the period of incubation of cholera is very short, being from a few hours to three days. Consequently should any person infected board one of the ships coming here the disease would manifest itself before the arrival of the vessel. The advantage of this is obvious—no vessel could arrive here with cholera on board without the quarantine physicians finding or hearing of cases. The outbreak of typhus which occurred in this city some months ago was produced by people who, owing to the long incubation of typhus, passed quarantine while apparently well.

Of course the germs might come here in rags, but the chances that rags have of passing without disinfection are extraordinarily small nowadays. As water and food are the carriers of the germs, it follows that these must be carefully watched should the disease find a lodgment here. It is most fortunate that the cholera bacillus can neither stand heat nor cold. A few days of sharp frost will stamp an epidemic of the disease out. Food must be eaten while hot and fresh from the fire, and water in cholera times must be boiled.—Cyrus Edson, M. D., in North American Review.

### A Summer Diversion.

A broker, who is well known on the Stock exchange for his proclivities as a practical joker, made considerable fun for some of his associates last week. He is sojourning in the country at present and dispensing hospitality to numbers of his comrades. He is rated among them as a particularly bad marksman, and so it was that when he took a number of them around back of the barn a few mornings since and showed them a target painted on the back of the barn and a bullet imbedded in the very center of the bullseye the first inquiry was:

"Who fired the shot?"

"I fired it, and from a distance of 200 yards, too," was his earnest reply.

"Oh, rats, rats!"

"Come off, now."

"You could not hit the barn at that distance."

But he persisted in his assertion and finally suggested that perhaps some of his friends would like to bet on it. He got two bets, one for a dinner for the crowd and another for a case of champagne. He then brought two witnesses who solemnly declared that they had seen the shot fired by him from a distance of two hundred yards, and from a rifle. The witnesses were beyond suspicion and the bets were paid.

During the jubilee that followed the broker confessed that he had painted the target on the barn after he had fired the shot.—New York Herald.

### Rarefied Air in the Catskills.

One reads often, and if one goes to Switzerland the sight is common, of travelers being overcome in the altitudes of the Alps from the too rarefied air. Such experiences are not so frequent here, but in August a New York woman found, on reaching one of the greatest elevations of the Catskills, that she suffered intensely in the effort to breathe. Ascribing the reason to various causes but the right one, she spent a week in her room trying to overcome it.

Her husband's alarm finally induced him to send for the family physician, who had his patient en route for home within an hour after he had seen her. It was fully a fortnight before she recovered from the effects of the exhaustion of the long strain. A simple remedy prescribed by Swiss physicians for vertigo and distress occasioned in this way is bromide of potassium administered in doses of ten grains.—New York Times.

### Making Smokeless Powder.

At Barwick, near Ware, England, stand the premises of the Smokeless Powder company, the only works of the kind in the kingdom. These works cover no fewer than 126 acres of ground; and a large company assembled there recently to watch the entire process of manufacture from the raw material to the finished explosive. This new compound differs from the old black gunpowder not only in its freedom from smoke when ignited, but also in the circumstance that it is unaffected by damp or extremes of temperature. After the works had been inspected the quality of the new powder was tried with various weapons by expert marksmen, and excellent practice was made. The exhibition concluded with the firing of 500 rounds from a Maxim gun, when it was shown that far less smoke was produced than with ten shots fired with the old fashioned gunpowder.—London Letter.

### DEWITT C. FRANKLIN,

### DENTIST.

WEST SUTTON STREET.

L. W. GALBRAITH,

### ATTORNEY

And Counsellor at Law. Practices in the courts of Mason and adjoining counties. Prompt attention paid to collectives.

W. S. YAZELL,

Second Street, Fifth Ward.

### PHYSICIAN AND SURGEON.

Office at home, 425 East Second Street.

The practical question which concerns us in this country is the danger to which we are exposed. This is not very great. In the first place the fact of the existence of the disease is known, and in such matters to be forewarned is emphatically to be forearmed. Second, the period of incubation of cholera is very short, being from a few hours to three days. Consequently should any person infected board one of the ships coming here the disease would manifest itself before the arrival of the vessel. The advantage of this is obvious—no vessel could arrive here with cholera on board without the quarantine physicians finding or hearing of cases. The outbreak of typhus which occurred in this city some months ago was produced by people who, owing to the long incubation of typhus, passed quarantine while apparently well.

Of course the germs might come here in rags, but the chances that rags have of passing without disinfection are extraordinarily small nowadays. As water and food are the carriers of the germs, it follows that these must be carefully watched should the disease find a lodgment here. It is most fortunate that the cholera bacillus can neither stand heat nor cold. A few days of sharp frost will stamp an epidemic of the disease out. Food must be eaten while hot and fresh from the fire, and water in cholera times must be boiled.—Cyrus Edson, M. D., in North American Review.
